M. Inglis

Astronomy of the Milky Way

The Observer’s Guide to the Southern Sky

This second edition of Mike Inglis’s classic guide to observing the Milky Way in the Southern Hemisphere updates all of the science about the target objects with new findings from the astrophysics field. In addition, the book boasts a larger format with entirely re-drawn maps. [...] 2nd ed. 2018. XVII, 269 p. 249 illus., 137 illus. in color. Due March 2018

L. J. Adam

Imaging the Messier Objects Remotely from Your Laptop

This is a guide for anyone interested in practical astronomy but intimidated by the idea of investing in a telescope. It explores the world of remote observing, which requires nothing more than a laptop and an Internet connection. [...] 2018. VIII, 570 p. 480 illus., 248 illus. in color. (The Patrick Moore Practical Astronomy Series) Softcover € 44,99 | £ 35,99 € (D) 48,14 | € (A) 49,49 | *CHF 49.50 ISBN 978-3-319-65384-6

Due February 2018

T. Treadwell

Astronomy Adventures and Vacations

How to Get the Most Out of Astronomy in Your Leisure Time

This astronomy travel guide examines the many wonderful opportunities for experiencing the observing hobby. Amateur astronomy is often consigned to observing from home or from a local park, yet it can be much more. Tim Treadwell explores all the possibilities of astronomical and space-related activities that are available on day trips and longer vacations. [...] 2017. XIV, 262 p. 170 illus. in color. Building a Roll-Off Roof or Dome Observatory

A Complete Guide for Design and Construction

Almost every practical astronomer eventually aspires to have a fixed, permanent observatory for his or her telescope. A roll-off roof or dome observatory is the answer for the most popular home observatory design. Building a Roll-Off or Dome [...] 

B. D. Warner

A Practical Guide to Lightcurve Photometry and Analysis

For those with access to even a modest telescope and CCD camera, this new and improved guide delivers all the information needed to take part in the scientific study of asteroids and variable stars. New techniques in photometry continue to be refined, and expert Brian Warner covers the developing territory in detail for those both new and experienced. [...]

Binocular Astronomy

Binoculars have, for many, long been regarded as an "entry level" observational tool, and relatively few have used them as a serious observing instrument. This is changing! Many people appreciate the relative comfort of two-eyed observing, but those who use binoculars come to realize that they offer more than comfort. [...]

D. E. Falkner
The Mythology of the Night Sky
An Amateur Astronomer's Guide to the Ancient Greek and Roman Legends
The Mythology of the Night Sky is intended primarily for amateur astronomers who would like to know the mythology behind the names of constellations and planets. It deals with the 48 constellations identified by the ancient Greek astronomer Ptolemy, as well as all the planets of our solar system and their moons, which are named after Roman gods. [...]
1,001 Celestial Wonders to See Before You Die
The Best Sky Objects for Star Gazers
1,001 Celestial Wonders is a guide to the
night sky's brightest and most fascinating
objects. Each target is accessible to amateur
astronomers using medium-sized telescopes
from a dark site. In fact, many are so bright
they remain visible under moderate light
pollution, as from the outskirts of a city or
the suburbs of a town. The book provides a
chronological target list, making it easy to
use. [...]

The 100 Best Astrophotography Targets
A Monthly Guide for CCD Imaging
with Amateur Telescopes
Any amateur astronomer who is interested in
astrophotography, particularly if just getting
started, needs to know what objects are best
for imaging in each month of the year. These
are not necessarily the same objects that are
the most spectacular or intriguing visually.
The camera reveals different things and has
different requirements. [...]

Astronomical Sketching: A
Step-by-Step Introduction
If you have ever gazed through the eyepiece
of a telescope at the magnificent rings and
banded globe of Saturn, or found yourself
breathless at the sight of long shadows
jutting across crater floors on the terminator
of the Moon, then you will understand the
power of those direct visual experiences. You
are present at a unique event, a connection
between a part of the cosmos, your eye and
brain. [...]

Spectroscopy: The Key to the Stars
Reading the Lines in Stellar Spectra
While most amateur astronomers know
about the red shift, have a general idea of
the way that the emission and absorption
lines in stellar spectra provide an insight into
the atomic processes of the star, it is unusual
to find someone who has any kind of
detailed knowledge. [...]

As space ventures have become more numerous, leading scientists and theorists have offered ways of building a living habitat in a hostile environment, taking an 'ecosystems' view of space colonization. The contributors to this volume take a radical multi-disciplinary view of the challenge of human space colonization through the ongoing project Persephone. [...]
U. Cavallaro

Women Spacefarers
Sixty Different Paths to Space

This book tells the fascinating stories of the valiant women who broke down barriers to join the space program. Beginning with the orbital flight of USSR cosmonaut Valentina Tereshkova in 1963, they became players in the greatest adventure of our time. [...]

To create the exotic materials and technologies needed to make stargates and warp drives is the holy grail of advanced propulsion. A less ambitious, but nonetheless revolutionary, goal is finding a way to accelerate a spaceship without having to lug along a gargantuan reservoir of fuel that you blow out a tailpipe. Tethers and solar sails are conventional realizations of the basic idea. [...]

Australia’s Little Space Travellers
The Flight Shaped Tektites of Australia

This book provides a showcase for the incredibly well-preserved flight-textured tektites of southern Australia, which are the world’s finest known examples. It provides an overview of their forms and flight features, which can be expected to appear, at least in part, on any objects falling from space. [...] 2017. XV, 64 p. 74 illus., 56 illus. in color. Softcover € 29,99 | £ 16,50 € (D) 32,09 | € (A) 32,99 | *CHF 33.00 ISBN 978-3-319-46051-2

M. Carroll

Europa’s Lost Expedition
A Scientific Novel

This classically styled, chilling murder mystery about a scientific expedition under the ice of Jupiter’s ocean moon Europa, backed up by the latest scientific findings on this icy satellite. The science fiction premise explores real possibilities of exploring other bodies in the Solar System, including probing their possible astrobiology. [...] 2017. XIV, 224 p. 10 illus., 2 illus. in color. (Science and Fiction) Softcover € 19,99 | £ 15,99 € (D) 21,39 | € (A) 21,99 | *CHF 22.00 ISBN 978-3-319-43158-1

H. Karttunen, P. Kröger, H. Oja, M. Poutanen, K. J. Donner (Eds)

Fundamental Astronomy

Now in its sixth edition, this successful undergraduate textbook gives a well-balanced and comprehensive introduction to the topics of classical and modern astronomy. While emphasizing both the astronomical concepts and the underlying physical principles, the text provides a sound basis for more profound studies in the astronomical sciences. [...] 6th ed. 2017. C. Vita-Finzi
A History of the Solar System
This well illustrated book presents a compact history of the Solar System from its dusty origins 4,600,000 years ago to the present day. Its primary aim is to show how the planets and their satellites, comets, meteors, interplanetary dust, solar radiation and cosmic rays continually interact, sometimes violently, and it reflects humanity’s progress in exploring and interpreting this history. [...] 2016. XII, 100 p. 54 illus., 43 illus. in color. Softcover

M. Carroll
Living Among Giants
Exploring and Settling the Outer Solar System

The outer Solar System is rich in resources and may be the best region in which to search for life beyond Earth. In fact, it may ultimately be the best place for Earthlings to set up permanent abodes. This book surveys the feasibility of that prospect, covering the fascinating history of exploration that kicks off our adventure into the outer Solar System. [...] 2015. The Observer’s Sky Atlas

With 50 Star Charts Covering the Entire Sky

Can you remember being impressed by a clear starry sky? Look at the Milky Way through binoculars and it will reveal its many hundreds of thousands of stars, double stars, stellar clusters, and nebulae. If you are a new observer, it is not that easy to find your way in this swarm of stars, but this atlas tries to make it as easy as possible. [...] 3rd ed. 2007. VI, 165 p. Total Addiction

The Life of an Eclipse Chaser

Seeing a total solar eclipse is often described as a once-in-a-lifetime experience. However, for many who have experienced totality, once-in-a-lifetime is simply not enough. They want more, and are willing to go to great lengths often at great expense to repeat the experience. What is it like to experience totality? What is it about the experience that motivates these eclipse chasers? [...] 2012. XII, 193 p. 12 illus. in color. (Copernicus) Softcover

How Spacecraft Fly

Spaceflight Without Formulae

The aim of this popular science text is to explain aerodynamic and astrodynamics flight without the use of mathematics, in an informal style, for non-technical readers who are interested in spaceflight and spacecraft. The book will open with a concise introductory chapter, chronicling the ‘space age’ up to the present, and a brief ‘forward look’ into near-future developments. [...] 2009. Alien Seas

Oceans in Space

Oceans were long thought to exist in all corners of the Solar System, from carbonated seas percolating beneath the clouds of Venus to features on the Moon’s surface given names such as “the Bay of Rainbows” and the “Ocean of Storms.” With the advent of modern telescopes and spacecraft exploration these ancient concepts of planetary seas have, for the most part, evaporated.
