New Publications
Physics & Astronomy

Dear reader,

Springer Nature is proud to offer you a rich selection of new book publications and bestselling backlist titles in Physics & Astronomy. It highlights the new titles most likely to interest specialists working in the professional field or in academia. You will find the international authorship and high quality contributions you have come to expect from the Springer Nature brand in every title. Please show this catalog to your buyers and acquisition staff. It is a premier and most authoritative source of new print book titles from Springer Nature. We offer you a wide range of publication types – from contributed volumes focusing on current trends, to handbooks for in-depth research, to textbooks for graduate students. If you are looking for something very specific, go to our online catalog at springer.com and search among the 286,563 books in print by keyword. The Advanced Search makes it easy to define any scientific subject you have. You can even download a catalog just like this one with your own personal selection – completely free of charge!

We hope you will enjoy browsing through our new titles and make your selection today!

With best wishes,

Ria Frauenfeld
Marketing Coordinator

Closing date: February 2018
M. Bukshtab
Photometry, Radiometry, and Measurements of Optical Losses

The revised 2nd edition of this practical book provides an expanded treatment and comparison of techniques used in advanced optical measurements, guiding its reader from fundamental radiometric and photometric concepts to the state-of-the-art in highly sensitive measurements of optical losses and in spectroscopic detection using coherent laser light and spontaneous radiation. [...] 2nd ed. 2018. XVI, 791 p. 487 illus., 483 illus. in color. (Springer Series in Optical Sciences, Volume 209) Hardcover

€ 279,00 | £ 244,50
€ (D) 298,53 | € (A) 306,90 | *CHF 307.00

Due April 2018

H. Fujiwara, R. Collins (Eds)
Spectroscopic Ellipsometry for Photovoltaics
Optical Constants of Solar Cell Materials

This book provides a basic understanding of spectroscopic ellipsometry, with a focus on characterization methods of a broad range of solar cell materials/devices, from traditional solar cell materials (Si, CulnGaSe2, and CdTe) to more advanced emerging materials (Cu2ZnSnS4, organics, and hybrid perovskites), fulfilling a critical need in the photovoltaic community. [...] 2018. XXVI, 1280 p. 660 illus., 230 illus. in color. (Springer Series in Optical Sciences, Volume 212) Hardcover

€ 219,99 | £ 179,99
€ (D) 235,39 | € (A) 241,99 | *CHF 242.00
ISBN 978-3-319-75375-1

Due June 2018

A. McGurn
Nanophotonics

This book gives a readable introduction to the important, rapidly developing, field of nanophotonics. It provides a quick understanding of the basic elements of the field, allowing students and newcomers to progress rapidly to the frontiers of their interests. [...] 2018. XII, 563 p. 98 illus., 10 illus. in color. (Springer Series in Optical Sciences, Volume 203) Hardcover

€ 139,99 | £ 119,99
€ (D) 149,79 | € (A) 153,99 | *CHF 154.00
ISBN 978-3-662-57701-0

Due April 2018

M. Nakasako
X-Ray Diffraction Imaging of Biological Cells

In this book, the author describes the development of the experimental diffraction setup and structural analysis of non-crystalline particles from material science and biology. [...] 2018. XX, 230 p. 96 illus., 89 illus. in color. (Springer Series in Optical Sciences, Volume 210) Hardcover

€ 129,99 | £ 109,99
€ (D) 139,09 | € (A) 142,99 | *CHF 143.00
ISBN 978-3-662-56616-8

Due May 2018

S. Sadewasser, T. Glatzel (Eds)
Kelvin Probe Force Microscopy
From Single Charge Detection to Device Characterization

This book provides a comprehensive introduction to the methods and variety of Kelvin probe force microscopy, including technical details. It also offers an overview of the recent developments and numerous applications, ranging from semiconductor materials, nanostructures and devices to sub-molecular and atomic scale electrostatics. [...] 2018. XXIV, 521 p. 234 illus., 194 illus. in color. (Springer Series in Surface Sciences, Volume 65) Hardcover

€ 139,99 | £ 119,99
€ (D) 149,79 | € (A) 153,99 | *CHF 154.00
ISBN 978-3-662-57588-8

Due April 2018
G. Bernardi
Giovanni Domenico Cassini
A Modern Astronomer in the 17th Century
This book offers a fascinating account of the life and scientific achievements of Giovanni Domenico Cassini, or Cassini I, the most famous astronomer of his time, who is remembered today especially for his observations of the rings and satellites of Saturn and his earlier construction of the great meridian line in the Basilica of San Petronio in Bologna. [...]
2017. XI, 186 p. 45 illus., 28 illus. in color. (Springer Biographies) Hardcover € 32,99 | £ 27,99 € (D) 35,30 | € (A) 36,29 | *CHF 36.50 ISBN 978-3-319-63467-8

M. E. Bakich
Imaging the Messier Objects Remotely from Your Laptop
This is a guide for anyone interested in practical astronomy but intimidated by the idea of investing in a telescope. It explores the world of remote observing, which requires nothing more than a laptop and an Internet connection. [...]
2018. VIII, 514 p. 471 illus., 246 illus. in color. (The Patrick Moore Practical Astronomy Series) Softcover € 44,99 | £ 39,99 € (D) 48,14 | € (A) 49,49 | *CHF 49.50 ISBN 978-3-319-65384-6

A. W. Alsabti, P. Murdin (Eds)
Handbook of Supernovae
This reference work gathers all of the latest research in the supernova field areas to create a definitive source book on supernovae, their remnants and related topics. [...]
2017. XXX, 2727 p. 850 illus., 680 illus. in color. In 3 volumes, not available separately. Hardcover € 1.299,99 | £ 1.099,99 € (D) 1.390,99 | € (A) 1.429,99 | *CHF 1.429.00 ISBN 978-3-319-21845-8

R. Aloisio, E. Coccia, F. Vissani (Eds)
Multiple Messengers and Challenges in Astroparticle Physics
This book, designed as a tool for young researchers and graduate students, reviews the main open problems and research lines in various fields of astroparticle physics: cosmic rays, gamma rays, neutrinos, cosmology, and gravitational physics. [...]
2018. VII, 552 p. 171 illus., 158 illus. in color. Hardcover € 189,99 | £ 166,50 € (D) 203,29 | € (A) 208,99 | *CHF 209.00 ISBN 978-3-319-65423-2
A. Bykov, E. Amato, J. Arons, M. Falanga, M. Lemoine, L. Stella, R. von Steiger (Eds)

Jets and Winds in Pulsar Wind Nebulae, Gamma-Ray Bursts and Blazars

Relativistic objects in astrophysics present a diverse set of phenomena and cover vast ranges of time scales and spatial scales, but their descriptions rely on a similar backbone: [...] 2018. IV. 360 p. 159 illus., 146 illus. in color. (Space Sciences Series of ISSI, Volume 62) Hardcover € 129,99 | £ 109,99 € (D) 139,09 | € (A) 142,99 | *CHF 143.00 ISBN 978-3-319-1291-8

M. Carroll

Earths of Distant Suns

How We Find Them, Communicate with Them, and Maybe Even Travel There

Based on the latest missions results and supported by commissioned artwork, this book explores the possible lessons we may learn from exoplanets. As the number of known Earth-like objects grows significantly, the author explores what is known about the growing roster of “pale blue dots” far afield. [...] 2017. C. Chiappini, F. Matteucci

A Natural History of the Milky Way

One of the most stunning features of the night sky, and Earth’s home, the Milky Way is fertile ground for exploring the mysteries of the universe. This book will provide an overview of how astronomers have attempted to uncover our Galaxy’s past, and how current models of its structure may account for some of the most recent observations. [...] 2018. XV. 285 p. (Springer Praxis Books) Softcover € 39,99 | £ 22,50 € (D) 42,79 | € (A) 43,99 | *CHF 44.00 ISBN 978-3-319-5757-2

H. J. Deeg, J. A. Belmonte (Eds)

Handbook of Exoplanets

This state-of-the-art reference work includes over 15 sections dealing with all aspects of exoplanets and exobiology research, including historic aspects, the Solar System as a template, objects at the planet-to-star transition, exoplanet detection and characterization with related instrumentation, technology and software tools, planet and planet-system statistics with recent and planned surveys, [...] 2018. 3500 p. Popular science
For centuries the British developed a reputation as a nation of explorers. From Francis Drake's circumnavigation of the globe to the ascent of Everest, British explorers crossed oceans and continents and ventured where few, if any, had gone before. Until very recently, that legacy of exploration had not extended to space. 

E. Seedhouse

**TIM PEAKE and BRITAIN'S ROAD TO SPACE**

For centuries the British developed a reputation as a nation of explorers. From Francis Drake's circumnavigation of the globe to the ascent of Everest, British explorers crossed oceans and continents and ventured where few, if any, had gone before. Until very recently, that legacy of exploration had not extended to space. 

E. Seedhouse

**Space Radiation and Astronaut Safety**

This brief explores the biological effects of long-term radiation on astronauts in deep space. As missions progress beyond Earth's orbit and away from the protection of its magnetic shielding, astronauts risk constant exposure to higher levels of galactic cosmic rays and solar particle events. 

D. A. J. Seargent

**Weird Comets and Asteroids**

The Strange Little Worlds of the Sun’s Family

This book concentrates on some of the odd aspects of comets and asteroids. Strange behavior of comets, such as outbursts and schisms, and how asteroids can temporarily act as comets are discussed, together with the possible threat of Centaurs-class objects like the Taurid complex. Recent years have seen the distinction between comets and asteroids become less prominent. 

D. W. Olson

**Further Adventures of the Celestial Sleuth**

Using Astronomy to Solve More Mysteries in Art, History, and Literature

From the author of “Celestial Sleuth” (2014), yet more mysteries in art, history, and literature are solved by calculating phases of the Moon, determining the positions of the planets and stars, and identifying celestial objects in paintings. In addition to helping to crack difficult cases, these studies spark our imagination and provide a better understanding of the skies. 

B. E. Penprase

**The Power of Stars**

Completely revised and updated, this new edition provides a readable, beautifully illustrated journey through world cultures and the vibrant array of sky mythology, creation stories, models of the universe, temples and skyscrapers that each culture has created to celebrate and respond to the power of the night sky. 

V. PLETSER

**On To Mars!**

Chronicles of Martian Simulations

This book introduces the Martian simulations of The Mars Society, the first one installed on Devon Island, an uninhabited island in the Canadian Arctic, well within the polar circle, and the second in the desert of Utah, several hundreds of kilometers South of Salt Lake City. 

B. E. Penprase

**The Power of Stars**

Completely revised and updated, this new edition provides a readable, beautifully illustrated journey through world cultures and the vibrant array of sky mythology, creation stories, models of the universe, temples and skyscrapers that each culture has created to celebrate and respond to the power of the night sky.

F. Scheck
Classical Field Theory
On Electrodynamics, Non-Abelian Gauge Theories and Gravitation
Scheck’s successful textbook presents a comprehensive treatment, ideally suited for a one-semester course. The textbook describes Maxwell’s equations first in their integral, directly testable form, then moves on to their local formulation. The first two chapters cover all essential properties of Maxwell’s equations, including their symmetries and their covariance in a modern notation. [...]

There Is No Theory of Everything

A Physics Perspective on Emergence

The main purpose of this book is to introduce a broader audience to emergence by illustrating how discoveries in the physical sciences have informed the ways we think about it. In a nutshell, emergence asserts that non-reductive behavior arises at higher levels of organization and complexity. [...] 2017. XIV, 224 p. 32 illus., 22 illus. in color. L. Q. English

Energy, Complexity and Wealth Maximization

This book is about the mechanisms of wealth creation, or what we like to think of as evolutionary “progress.” The massive circular flow of goods and services between producers and consumers is not a perpetual motion machine; it has been dependent for the past 150 years on energy inputs from a finite storage of fossil fuels. [...] 2016. XXV, 593 p. 121 illus., 120 illus. in color. (The Frontiers Collection) Hardcover

Nonequilibrium Dynamics of Collective Excitations in Quantum Materials

This book studies the dynamics of fundamental collective excitations in quantum materials, focusing on the use of state-of-the-art ultrafast broadband optical spectroscopy. Collective behaviour in solids lies at the origin of several cooperative phenomena that can lead to profound transformations, instabilities and phase transitions. [...] 2018. LIV, 316 p. W. Sánchez, D. Newman

A Primer on Complex Systems With Applications to Astrophysical and Laboratory Plasmas

The purpose of this book is to illustrate the fundamental concepts of complexity and complex behavior and the best methods to characterize this behavior by means of their applications to some current research topics from within the fields of fusion, earth and solar plasmas. In this sense, it is a departure from the many books already available that discuss general features of complexity. [...] 2018. XX, 404 p. 164 illus., 160 illus. in color. Statistical Physics for Biological Matter

This book aims to cover the basics of statistical physics at large, including statistical mechanics (equilibrium and non-equilibrium), soft matter and fluid physics, for applications to biological phenomena at both cellular and macromolecular levels. It is expected to be a graduate level textbook, but can also be addressed to the interested senior level undergraduate. [...] 2018. 400 p. (Graduate Texts in Physics) Hardcover

C. Gerhardt

The Quantization of Gravity

A unified quantum theory incorporating the four fundamental forces of nature is one of the major open problems in physics. The Standard Model combines electromagnetism, the strong force and the weak force, but ignores gravity. The quantization of gravity is therefore a necessary first step to achieve a unified quantum theory.
J. Rafelski
Relativity Matters
From Einstein’s EMC2 to Laser Particle Acceleration and Quark-Gluon Plasma
Rafelski presents Special Relativity in a language deemed accessible to students without any topical preparation - avoiding the burden of geometry, tensor calculus, and space-time symmetries – and yet advancing in highly contemporary context all the way to research frontiers. [...]

Quantum Physics, Mini Black Holes, and the Multiverse
Debunking Common Misconceptions in Theoretical Physics
“Modern physics is rife with provocative and fascinating ideas, from quantum mechanics to the multiverse. But as interesting as these concepts are, they are also easy to understand. This book, written with deft hands by true experts in the field, helps to illuminate some of the most important and game-changing ideas in physics today.” [...] 2018. XIV, 212 p. 190 illus., 71 illus. in color. (Multiversal Journeys) Hardcover
€ 29,99 | £ 16,50

A. Lvovsky
Quantum Physics
An Introduction Based on Photons
This textbook is intended to accompany a two-semester course on quantum mechanics for physics students. [...] 2018. XXI, 540 p. (Undergraduate Lecture Notes in Physics) Softcover
€ 59,99 | £ 49,99
€ (D) 64,19 | € (A) 65,99 | *CHF 66.00
ISBN 978-3-662-56582-7

J. Rafelski
Relativity Matters
From Einstein’s EMC2 to Laser Particle Acceleration and Quark-Gluon Plasma
Rafelski presents Special Relativity in a language deemed accessible to students without any topical preparation - avoiding the burden of geometry, tensor calculus, and space-time symmetries – and yet advancing in highly contemporary context all the way to research frontiers. [...] 2017. XXV, 468 p. 85 illus., 63 illus. in color. (Springer Nature Textbooks 2017/18 - HE site) Softcover
€ 74,99 | £ 64,99
€ (D) 80,24 | € (A) 82,49 | *CHF 82.50
ISBN 978-3-319-51230-3
In this compendium of essays, some of the world's leading thinkers discuss their conceptions of space and time, as viewed through the lens of their own discipline. With an epilogue on the limits of human understanding, this volume hosts contributions from six or more diverse fields. It presumes only rudimentary background knowledge on the part of the reader. 

2017. XXIII, 530 p. 51 illus. (The Frontiers Collection) Hardcover
