**Robotic Surgery for Abdominal Wall Hernia Repair**

*An A Manual of Best Practices*

This book is a surgical manual, intended to present and discuss the use of robotic surgery for abdominal wall hernia repair. It comprises the most important surgical approaches in the field, presenting step by step procedures in a clear and didactic way. Abdominal wall hernias are very common conditions, easily identifiable in clinical practice and that usually require a surgical intervention as treatment. However, the choice for the right surgical procedure to treat those conditions may [...] Springer 2018. XV, 166 p. 100 illus., 94 illus. in color. Hardcover € 84,99 | £ 74,99

**Neuroimaging: Anatomy Meets Function**

This book combines classic MR anatomy with current understanding of human brain function. Recent advances in neuroscience have highlighted the importance of correlating brain anatomy with underlying brain function, since the brain contains a highly sophisticated organization of anatomical and functional relationships that are not readily “visible” with standard imaging. The use of magnetic resonance imaging is rapidly increasing in the field of neuroscience, and remains at the forefront for […]

**Surgery of the Inferior Vena Cava: A Multidisciplinary Approach**

This book addresses an urgent need, offering an updated, detailed and multidisciplinary review of surgery of the inferior vena cava (IVC). Over the past two decades, tremendous advances have been made in this field and related specialties. Many journals and/or textbooks on different surgical or medical specialties have reported on individual aspects, so it is high time to gather all of them in a single resource. To date, surgery of the IVC remains a major challenge, not only in terms of […]

**The Changing Faces of Childhood Cancer: Clinical and Cultural Visions since 1940**

This book traces the development of British answers to the problem of childhood cancer. The establishment of the NHS and better training for paediatricians, meant children were given access to experimental chemotherapy, sending cure rates soaring. Children with cancer were thrust into the spotlight as individuals’ stories of hope hit the headlines.

**Serious Games in Physical Rehabilitation**

From Theory to Practice

Marketing text: This innovative book explores how games can be serious, even though most people generally associate them with entertainment and fun. It demonstrates how videogames can be a valuable tool in clinics and demonstrates how clinicians can use them in physical rehabilitation for various pathologies. It also describes step by step their integration in rehabilitation, from the (gaming) technology used to its application in clinics. Further, drawing on an extensive literature review, […]

Volume 2 Common Gastrointestinal and Abdominal Emergencies

This pocket manual is a practically oriented guide to abdominal and gastrointestinal emergencies in acute care surgery. It covers the most common injuries to the entire area, offering careful descriptions of diagnostic procedures, surgical techniques and non-operative management. The guide stems from collaboration with the World Society of Emergency Surgery (WSES) and aims to provide general surgeons, residents and trainees with a comprehensive and up-to-date overview of the most relevant aspects.

Interventions in Pulmonary Medicine

This new edition offers comprehensive coverage of all areas of interventional pulmonology, a minimally invasive endoscopic method for diagnosing and treating lung disorders. The text is divided into eight sections on the major areas of interventional pulmonology, including basic endoscopy, lung cancer staging, and interventional bronchoscopy in asthma and emphysema. Chapters then explore specific procedures and techniques, including medical thoracoscopy, flexible and rigid bronchoscopy.

Complications in Acute Care Surgery

The Management of Difficult Clinical Scenarios

This text provides the reader a starting point for the most difficult and uncommon complications in acute care surgery. It is designed to provide options to that ubiquitous intra-operative or bedside question “Well, now what do we do with this?” The topics have been chosen for the extreme difficulty of management and the surprising regularity that they present and the lack of large volume of accumulated evidence, where expert experience remains vital. The volume editors present a list of clinical scenarios for the most difficult and uncommon complications in acute care surgery. **Public Health Ethics and the Social Determinants of Health**

This progressive resource places concepts of social determinants of health in the larger contexts of contemporary health ethics and the evolution of social reform. It provides needed analysis of the larger causes behind the immediate causes of illness and epidemics, particularly injustice, systemic inequities, and the cumulative effect of compound disadvantages. This moral approach to collective and individual responsibilities—on the part of practitioners as well as the public—supports a […]

**Modified Inferior Turbinoplasty**

A new surgical approach

Humans can resist 40 days without eating and 4 days without drinking, but only 4 minutes without breathing: this tells us much about its fundamental importance. Breathed air is slowed down, filtered, warmed and humidified by the nose; many mechanisms are involved in this act, which prevent bronchial tubes and pulmonary alveolus from receiving an excessive and sudden air load. It is well known, on the other hand, that breathing through the mouth causes a lot of problems: inflammatory diseases [...] Springer

**Therapeutic Angiogenesis**

The book discusses recent findings and current perspectives on therapeutic angiogenesis. Studies have shown that therapies such as cell implantation and transfer of gene encoding for angiogenic growth factors are effective in improving symptoms in patients with critical limb ischemia, who previously had no treatment option other than amputation. The book discusses these therapies and presents data collected in clinical studies over the past decade. Despite significant advances in therapeutic …

**Hormones and the Endocrine System**

*Textbook of Endocrinology*

This book focuses on hormones, and on how they are produced in very diverse regions of the body in humans and animals. But hormones can be found not only in vertebrates, but also in insects, shellfish, spiders, mollusks, even at the origin of metazoan diversification and exhibit the same pathways of synthesis. The book addresses the different classes of hormones: protein/peptides hormones, steroids and juvenile hormones and hormones like catecholamines, thyroid hormones and melatonin. It […]

**Pocket Primer on the Rheumatic Diseases**

For eight decades the Primer on the Rheumatic Diseases has been the standard text from which most medical students and house officers have learned rheumatology. I myself will never forget thumbing through an older edition of the Primer as a second-year resident, while waiting to review a perplexing patient with my tutor. Fortunately the tutor was ringing late with his own patients, so I had time to flip through the book – then much thinner – a couple of times. While turning the pages, per- ing […]

**Textbook of Neuromodulation**

*Principles, Methods and Clinical Applications*

Until recently, it was thought that the adult brain is modifiable only during early stages of ontogenesis. However, neurophysiological and neuroimaging studies now indicate that the mature human brain is, under certain conditions, capable of substantial neuroplastic changes. Neuroplasticity reflects the ability of the human brain to alter the pattern of neural activation in response to previous experience, and recent findings indicate that the effects of experience can lead to both […]

**Precision Medicine in Gynecology and Obstetrics**

This volume presents the scientific advances and current status of our understanding of precision medicine for common diseases in gynecology and obstetrics. Standard treatments based on clinical guidelines in the field have been established for decades, and those are essential to daily clinical practice. Meanwhile, comprehensive genomic and genetic analyses have led to personalized medicine by precise clinical and genomic approaches. This book is organized into two major parts, gynecology and obstetrics.

**Clinical Cases in Phototherapy**

This case book will be based on real life scenarios of patient cases which have been encountered over several decades in one of the largest phototherapy centers in the United States. To our knowledge, there has not been anything similar published to date. By presenting various cases and how to manage such cases, we aim to educate dermatology trainees and practicing dermatologist who are trying to familiarize themselves with phototherapy. A recent study has shown that many dermatologists do this on their own.

**Primary Well-Being: Case Studies for the Growing Child**

This book offers solutions on how to enhance the normal development of the well child incorporating complementary medicine. The primary care provider is the only healthcare professional to see every child (0-18) and their parent, and can assess the child’s health and advise parents on how to provide a healthy environment and important practices to nurture healthy children. The book provides realistic scenarios encountered by new nurse practitioners in their clinical training. It is intended for all pediatric practitioners and team members involved in the care of children ages 0-18 years.

**State of the art in Blepharoplasty**

From Surgery to the Avoidance of Complications

This book focuses on the surgical procedure for aesthetically correcting ageing defects of the eyelids. After a brief introduction and a section on the anatomy of the periorbital area, the latest innovative techniques are described in detail with the aid of high-quality images. The author also presents his laser-assisted blepharoplasty technique. The second part of the book provides an overview of the most common complications in blepharoplasty, and how to avoid them. In addition it guides all plastic surgeons in their everyday work.

**A Case-Based Manual for Understanding and Interpreting Bone Densitometry**

Despite public perception, osteoporosis remains a widespread, devastating disease, and a very serious and costly public health threat. Early detection and treatment must be a priority for primary health care providers. Dual-energy X-ray absorptiometry (DXA) is the principal x-ray technology used to diagnose osteoporosis in its early, asymptomatic stages, to assess treatment efficacy, and to guide treatment decisions. It remains the gold standard today. A DXA Primer for the Practicing [...] Springer

Navigated Transcranial Magnetic Stimulation in Neurosurgery

This book is the first comprehensive work summarizing the advances that have been made in the neurosurgical use of navigated transcranial magnetic stimulation (nTMS) over the past ten years. Having increasingly gained acceptance as a presurgical mapping modality in neurosurgery, today it is widely used for preoperative mapping of cortical motor and language function, risk stratification and improving the accuracy of subcortical fiber bundle visualization. Manual of Gynecardiology
Female-Specific Cardiology

This book provides a much-needed, internationally oriented text, focusing on specific aspects of heart disease in women. Despite the large amount of information available, there is still considerable confusion regarding female patients. As such, the book highlights the health events that occur during aging in women and that may influence the future CVD risk. For instance, pregnancy-related disorders are important predictors for CVD risk in women, and inflammatory diseases like rheumatic, […]

Foundations of Ophthalmology
Great Insights that Established the Discipline

There have been books over the years discussing the history of ophthalmology, but none that focus directly on just the most critical thinkers whose insights provided the foundation for the discipline. These men and women advanced knowledge about vision, diagnosis, disease mechanisms, and therapy through innovative thinking and perseverance against old ideas. Their stories are intriguing at a personal level and for showing the complexity of advancing medical science and, therefore, should be […]

Opioid Dependence
A Clinical and Epidemiologic Approach

The book begins with a public health/epidemiologic examination of the situation, with a systematic view of the problem based on classic infectious disease epidemiologic principles applied to this behavioral health issue. This application is expanded to take into account the fact that unlike most epidemics in our species’ history, a unique factor that must be accounted for most epidemics in our species’ history, a host (opioid-dependent/misusing patient) is generally not under sufficiently […]

Hand and Wrist Rehabilitation

Theoretical Aspects and Practical Consequences

This work demonstrates that hand and wrist rehabilitation calls for precise anatomical, biomechanical, and physiological expertise, as well as mastery of manual techniques and targeted physiotherapy. Particular attention is given to the complementarity between theoretical knowledge and practical aspects; accordingly, refreshers on the underlying theory: descriptions of the rehabilitation protocols and the specific manual and instrumental techniques; and the type of orthosis used depending on […]

The Practice of Surgical Pathology

A Beginner’s Guide to the Diagnostic Process

Within the field of pathology, there is a wide gap in pedagogy between medical school and residency. As a result, the pathology intern often comes into residency unprepared for the practical demands of the field, and without the foundation to digest professional-level textbooks. Completely illustrated in color, this book is uniquely directed at the junior pathology resident, and goes first through some very basic introductory material, then progresses through each organ system. Within each […]

**Radiology for PET/CT Reporting**

Reading PET/CT scans is sometimes challenging. Not infrequently, abnormal findings on CT images are functionally silent and therefore difficult for nuclear medicine practitioners to interpret. Furthermore, in general only a low-dose CT scan is produced as part of the combined PET/CT study, and the resulting CT images may prove suboptimal for image interpretation. This atlas is designed to enable nuclear medicine practitioners who routinely read PET/CT scans to recognize the most common CT […]

**Illustrated Anatomical Segmentectomy for Lung Cancer**

Advances in CT have enabled us to detect small lung cancers, which has changed the lung cancer surgery from lobectomy to a lesser lobar resection such as a segmentectomy or wedge resection. While wedge resection is a simple procedure, it has a higher risk of local recurrence of cancer than a lobectomy. On the other hand, segmentectomy is a well known curative surgery for small lung cancers. However, it is difficult to perform accurately because of its anatomical complexity, which makes […]

Fractional Bone Contouring Surgery
A Practical Guide

This book is a practical and detailed guide on how to perform a range of surgical techniques for facial bone contouring. Based on the clinical experiences gained by the authors while carrying out more than 10,000 facial bone surgeries at their clinical institute in Seoul, Korea, each procedure is meticulously described and illustrated, step by step. Important, carefully attention is paid to the impact of ethnic differences on surgical technique and goals, drawing on lessons learned during [...] Springer

The History of Technologic Advancements in Urology

This text explores the history and development of the many technologies that have led to how we treat contemporary urologic problems. From the development of the cystoscope, the advances in laparoscopy, the birth of the field of endourology, to the era of robotics today, urologists have pushed the envelope in technologic innovation. The editors highlight the development of the cystoscope and the early tools used to treat ureteral stones, the development of ureteroscopy, and the applications [...] Springer

A Guide to Psychosocial and Spiritual Care at the End of Life

H. S. Perkins

Psychological, social, and spiritual care is as important as physical care at the end of life. Yet caregivers often feel ill-equipped to give that nonphysical care. This book shows how to do it. The book addresses all caregivers who attend dying patients: doctors, nurses, chaplains, clergy in the pastorate, social workers, clinical psychologists, family caregivers, and others. It covers such topics as the functional and emotional trajectories of dying; the varied approaches of patients and [...] Springer

Laparoscopic Surgery

G. Pignata, U. Bracale, F. Lazzara

Key Points, Operating Room Setup and Equipment

This book is distinctive in that it is a truly practical guide to use of the laparoscopic approach for the treatment of many abdominal diseases. Rather than simply offering a general description of surgical laparoscopic techniques, it provides the knowledge required in order to introduce basic laparoscopic procedures into daily practice or to commence advanced laparoscopic surgery. For each surgical procedure, key points are highlighted, the necessary equipment is described, and the [...] Springer

**Interpreting Health Benefits and Risks**

A Practical Guide to Facilitate Doctor-Patient Communication

This timely guide to communication in patient-centered medicine argues for greater clarity in explaining health risks versus benefits of an array of screening tests, procedures, and drug regimens. It reviews the growing trend toward patients’ involvement in their own care, particularly in terms of chronic conditions, and details approaches physicians can use to prepare patients (and themselves) for collaborative decision-making based on informed choices and clear, meaningful knowledge. Muscle Injuries in Sport Athletes
Clinical Essentials and Imaging Findings
This book attempts to provide a comprehensive look at all of the pathologies of muscles that are likely to be encountered in treating sports-related injuries. Its purpose is to give the practitioner a guide for identifying injuries and choosing the best therapeutic strategy. The first part presents the consensus view of current knowledge: the physiology of lesions and their prognosis as well as their anatomy, clinical imaging, and treatment. Then each of the muscles is described in turn. […]

<td>The Broca-Wernicke Doctrine A Historical and Clinical</td>
<td>G. Rutten</td>
<td>This book discusses theories that link functions to specific anatomical brain regions. The best known of these are the Broca and Wernicke regions, and these have become synonyms for the location of productive and receptive language functions respectively. This Broca-Wernicke model has proved to be such a powerful concept that is remains the predominant view in modern clinical practice. What is fascinating, however, is that there is little evidence for this strictly localist view on language [...]</td>

**The Amazing Language of Medicine**
*Understanding Medical Terms and Their Backstories*

This book tells the intriguing and often colorful stories of the medical words we use. The origins of clinical and scientific terms can be found in Greek and Latin myths, in places such as jungles of Uganda and the islands of the Aegean Sea, in the names of medicine’s giants such as Hippocrates and Osler, and in some truly unlikely sources. In this book you will learn the answers to questions such as: • What disease was named for an American space flight? • Do you know the echoic word for […]

**Learning Cardiac Auscultation**
*From Essentials to Expert Clinical Interpretation*

The book contains a series of core auscultation “lessons”. All are case based and describe auscultation as it relates to a patient and in terms of the gold standard for interpretation of heart sounds. Auscultation is the term for listening to the internal sounds of the body, usually using a stethoscope. It is performed for the purposes of examining the circulatory system and respiratory system (heart sounds and breath sounds). As a topic it is one of the oldest in cardiology but its utility […]

**Academic Promotion for Clinicians**

*A Practical Guide to Academic Promotion and Tenure in Medical Schools*

This book is a practical guide to the appointment, promotion, and tenure (APT) process for clinical faculty members employed by medical schools. The number of clinical faculty members in US medical schools has increased exponentially in the last two decades. At the same time, faculty career tracks and promotion requirements have changed dramatically and medical schools have introduced multiple non-tenure career tracks. Currently, only about 25% of the approximately 150,000 members of [...] Springer

**Personalized Management of Gastric Cancer**

Translational and Precision Medicine

This book offers essential information on basic and translational research in gastric cancer, while also illustrating potential opportunities for its application in clinical practice. Gastric cancer is the fourth-most common cancer globally and the second-leading cause of cancer deaths. It is known to be a heterogeneous disease with varied responses to “one-size-fits-all” treatments. Expanding our knowledge of cancer cell genetics may help us to explore more effective treatments in gastric […]

**Cancer-Related Fatigue**

Cancer-related fatigue (CrF) is increasingly recognized as a significant problem for patients with cancer at all stages, including those undergoing therapy and in remission. In fact, studies have shown that CrF causes patients more distress than pain, nausea, or vomiting and yet fatigue is still often undertreated and rarely studied. However, several new treatments such as are being investigated to determine the most effective ways to manage this debilitating symptom and improve patient […]

**Food Safety = Behavior**

30 Proven Techniques to Enhance Employee Compliance

This book helps in achieving food safety success which requires going beyond traditional training, testing, and inspectional approaches to managing risks. It requires a better understanding of the human dimensions of food safety. In the field of food safety today, much is documented about specific microbes, time/temperature processes, post-process contamination, and HACCP—things often called the hard sciences. There is not much published or discussed related to human behavior—often referred […]

**OCT Atlas**

OCT provided a great advantage over other diagnostic modalities, as it could noninvasively provide tomographic images of the retina of a living eye. As a result, a number of new findings in retinal diseases were made using the time-domain OCT. OCT has now become an essential medical equipment in ophthalmic care and quality textbooks describing the functionality of OCT are very important in the education of young ophthalmologists and eye care […]
