Open Access Book and Chapter Publishing at SpringerOpen

SpringerOpen publishes open access books and chapters across a wide range of areas within science, technology, medicine (STM), humanities and social sciences (HSS). All SpringerOpen books and chapters are freely available online at SpringerLink and listed in the Directory of Open Access Books (DOAB). Springer is part of Springer Nature, a global publisher that serves and supports the research community.

Publishing open access with SpringerOpen

- **Global readership and copyright retention**
  Readers worldwide can share and reuse books and chapters published open access using the Creative Commons Attribution (CC BY) License, ensuring maximum reuse as well as enabling authors to retain copyright for their work.

- **High visibility**
  In addition to SpringerLink, Web of Science and Scopus all SpringerOpen books and chapters are listed in the Directory of Open Access Books (DOAB) and, where appropriate, PubMed’s NCBI Bookshelf. Inclusion on these sites enhances the visibility and discoverability of your work.

- **Professional and rigorous peer-review process**
  All open access content published adheres to the high standards expected of all Springer Nature titles with the same rigorous peer-review process.

- **Compliance with funder mandates**
  Publishing open access with SpringerOpen supports compliance with worldwide funders’ open access policies.

- **A book processing charge (BPC)** covers all the costs of commissioning, copyediting and proofreading, production, dissemination and promotion.

- **Print formats** also available.

**Book types accepted:**

- Monographs
- Contributed volumes
- Proceedings
- Protocols
- SpringerBriefs
- Open access chapters

Benefits of open access:

- Increased visibility and readership
- Greater understanding of research outside the community
- Unrestricted access to knowledge
- Authors retain copyright for their own work
- Facilitates interdisciplinary collaboration

Licensing:
The default license for Springer Nature open access books and chapters is the Creative Commons Attribution International License (CC BY 4.0). This is the most open license available and considered the industry 'gold standard' for open access; it is also preferred by many funders. Readers may copy and redistribute the material in any medium or format, and alter, transform, or build upon the material, including for commercial use, providing the original author is credited. The author retains copyright. Other licenses are available on request.

Bookmetrix:
Bookmetrix is a unique platform that Springer Nature developed in partnership with Altmetric. It offers authors a comprehensive overview of the reach, usage and readership of their book or chapter by providing various book-level and chapter-level metrics all in one place.

Funding support service:
Springer Nature offers a free open access support service to make it easier for our authors to discover and apply for BPC funding.

Funders across the world including the Wellcome Trust, the Austrian Science Fund and the Netherlands Organization for Scientific Research support OA book and chapter publishing by providing funds to pay for BPCs. We can help to see if you are eligible for funding support through your funder or institution.

We can:
- Provide tailored information on the open access funds available to you.
- Direct you to the correct open access funding coordinator at your institution/ funding body.
- Provide advice about compliance with funders' and institutions' open access policies.
- Supply you with the information and advice required to complete an open access funding application.
