New Publications
Earth Sciences, Environment & Geography

Dear reader,

Springer Nature is proud to offer you a rich selection of new book publications and bestselling backlist titles in Earth Sciences, Environment & Geography. It highlights the new titles most likely to interest specialists working in the professional field or in academia. You will find the international authorship and high quality contributions you have come to expect from the Springer Nature brand in every title. Please show this catalog to your buyers and acquisition staff. It is a premier and most authoritative source of new print book titles from Springer Nature. We offer you a wide range of publication types – from contributed volumes focusing on current trends, to handbooks for in-depth research, to textbooks for graduate students. If you are looking for something very specific, go to our online catalog at springer.com and search among the 286,563 books in print by keyword. The Advanced Search makes it easy to define any scientific subject you have. You can even download a catalog just like this one with your own personal selection – completely free of charge!

We hope you will enjoy browsing through our new titles and make your selection today!

With best wishes,

Ria Frauenfeld
Marketing Coordinator

Closing date: February 2018
A. Y. Glikson, F. Pirajno

Asteroids Impacts, Crustal Evolution and Related Mineral Systems with Special Reference to Australia

This book presents a comprehensive overview of Australian impact structures and related mineralization, including a discussion of the significance of many of these structures for crustal evolution. [...]  
2018. XXII, 215 p. 130 illus., 109 illus. in color. (Modern Approaches in Solid Earth Sciences, Volume 14) Hardcover  
$ 149.99  
ISBN 978-3-319-74544-2

M. H. Trauth, E. Sillmann

Collecting, Processing and Presenting Geoscientific Information  
MATLAB® and Design Recipes for Earth Sciences

This second edition is an intensively revised and updated version of the book MATLAB® and Design Recipes for Earth Sciences. It aims to introduce students to the typical course followed by a data analysis project in earth sciences. [...]  
2nd ed. 2018. XIII, 274 p. 53 illus., 48 illus. in color. (Springer Textbooks in Earth Sciences, Geography and Environment) Hardcover  
$ 99.00  
ISBN 978-3-662-56202-4

C. S. Cronan

Ecosystem Biogeochemistry  
Element Cycling in the Forest Landscape

This textbook presents a comprehensive process-oriented approach to biogeochemistry that is intended to appeal to readers who want to go beyond a general exposure to topics in biogeochemistry, and instead are seeking a holistic understanding of the interplay of biotic and environmental drivers in the cycling of elements in forested watersheds. [...]  
2018. XIII, 203 p. 181 illus., 35 illus. in color. (Springer Textbooks in Earth Sciences, Geography and Environment) Hardcover  
$ 99.99  
ISBN 978-3-319-66443-9

G. P. Cimellaro, S. Marasco

Introduction to Dynamics of Structures and Earthquake Engineering

This work is an elementary but comprehensive textbook which provides the latest updates in the fields of Earthquake Engineering, Dynamics of Structures, Seismology and Seismic Design, introducing relevant new topics to the fields such as the Neodeterministic method. [...]  
2018. XXI, 598 p. 523 illus., 248 illus. in color. With online files/update. (Geotechnical, Geological and Earthquake Engineering, Volume 45) Hardcover  
$ 119.00  
ISBN 978-3-319-72540-6

L. Coppola

Hydrogeological Instability in Cohesive Soils

Techniques for Prediction, Prevention and Control

This book discusses techniques for predicting, preventing and controlling the hydrogeological instability of slopes consisting of cohesive soils. [...]  
2018. XV, 278 p. 174 illus., 45 illus. in color. Hardcover  
$ 119.99  
ISBN 978-3-319-74330-1

X. Wang, Z. Yu, J. Wang, J. Zhang (Eds)

Carbon Cycle in the Changing Arid Land of China

Yanqi Basin and Bosten Lake

This book integrates the analyses of organic carbon and carbonate accumulation in soil and lake sediment in a typical arid region of China that has experienced significant climate and land-use changes. It demonstrates that carbonate accumulation greatly exceeds organic carbon in both soil and sediment. [...]

Geoethics In Latin America

This book studies geoethics in Latin America and offers comprehensive research on geoethics and geeducation. Its respective chapters explore geoethics in relation to UNESCO geoparks, mining activities in Latin America, natural hazards and risk management. [...] 2018. VIII, 205 p. 44 illus., 34 illus. in color. (The Latin American Studies Book Series) Hardcover $139.99 ISBN 978-3-319-75372-0
This book presents a comprehensive assessment of clastic sedimentology and its application to reservoir geology. It covers the theoretical foundations of the topic and its use for scientists as well as professionals in the field. [...] 2018. XVI, 710 p. 404 illus., 202 illus. in color. (Advances in Oil and Gas Exploration & Production) Hardcover $ 279.00 ISBN 978-3-319-70334-3

The Azores archipelago consists of nine islands that emerge from the Azores Plateau in the Central Northern Atlantic, situated within the triple junction of the American, Eurasian and African lithosphere plates. Subaerial volcanic activity has been well known since the Pliocene and continues today, with several well-documented eruptions since the settlement of the islands in the fifteenth century. [...] 2018. XV, 355 p. 146 illus., 121 illus. in color. (Active Volcanoes of the World) Hardcover $ 129.00 ISBN 978-3-642-32225-9

This book introduces the geological concept of the “windfield-source-basin system,” based on integrated modern and ancient sedimentology studies. It identifies wind field as a main sedimentation-controlling factor that combines with provenance and basin dynamics to determine the formation and distribution of depositional systems. [...] 2018. XVIII, 328 p. 308 illus., 245 illus. in color. (Springer Geology) Hardcover $ 229.00 ISBN 978-981-10-7406-6

This book describes the Mesozoic to Cenozoic evolution of the Chilean and Argentinean Andes. The book is structured from a historical perspective concentrating on specific processes explained in each chapter. [...] 2018. XXV, 564 p. 166 illus., 162 illus. in color. (Springer Earth System Sciences) Hardcover $ 189.00 ISBN 978-3-319-67773-6

This book offers as comprehensive an overview as possible of the lithostratigraphy of the Italian region of Sicily, taking into account the multiplicity of formational and terminological variability developed over more than a century of studies and publications. [...] 2018. XXIII, 349 p. 154 illus., 137 illus. in color. (UNIPA Springer Series) Hardcover $ 139.99 ISBN 978-3-319-73941-0

This book provides a comprehensive overview of the geological evolution of the Northern Andes and contiguous shield areas, with a focus upon Colombia. Updated geological interpretations are supported by modern lithochemical, seismic, gravity and magnetic data and radiogenic isotope and radiometric age determinations. [...] 2018. X, 1044 p. 286 illus., 264 illus. in color. (Frontiers in Earth Sciences) Hardcover $ 279.99 ISBN 978-3-319-76131-2

Allow yourself to be taken back into deep geologic time when strange creatures roamed the Earth and Western North America looked completely unlike the modern landscape.

R. C. Blakey, W. D. Ranney
Ancient Landscapes of Western North America
A Geologic History with Paleogeographic Maps

2018. XI, 228 p. 146 illus. in color. Hardcover
$ 49.99
ISBN 978-3-319-59634-1

A. Mukherjee
Groundwater of South Asia

This book presents recent findings from the South Asian region (SA), broadly including groundwater studies on (a) quantity, (b) exploration, (c) quality and pollution, (d) economics, management and policies, (e) groundwater and society, and (f) sustainable sources. It offers a compilation of compelling, authentic insights into groundwater scenarios throughout the water-stressed South Asia region.

The 2016 Mw 7.1 Kumamoto Earthquake
A Photographic Atlas of Coseismic Surface Ruptures Related to the Aso Volcano, Japan

This book shows the deformation characteristics of coseismic surface ruptures produced by the 2016 Kumamoto earthquake and the relationship between the Aso volcano and active faults. In particular, the rupturing mechanisms and processes involved in the seismonic faults related to the crustal structure under the Aso volcano caldera are covered.

This book addresses environmental and medical issues that could risk our well-being, our health, or even cause death. Some of the issues analysed could have negative consequences not only today but also for future generations if not prevented in time.

---

**Biodiversity Offsets**

*European Perspectives on No Net Loss of Biodiversity and Ecosystem Services*

This book deals with the new concept of biodiversity offsets. The aim of offsetting schemes is to achieve no net loss or even net gain of biodiversity. Offsets obey a mitigation hierarchy and reflect the precautionary and polluter-pays principle in regard to project impacts. [...]

Soils are neither good nor bad, but some have inherent or acquired characteristics that may or may not suit our intended use. Unsuitable characteristics are considered to be soil problems, soil constraints or soil limitations. Only twelve percent of global land is right for agricultural production without much limitation. Some soils have severe limitations for crop production.
This book provides information on the latest research findings that are useful in the context of designing sustainable houses and living in rapidly growing Asian cities. The book is composed of seven parts, comprising a total of 50 chapters written by 53 authors from various countries, mainly in the Asian region. [...]

Tokyo as a Global City
New Geographical Perspectives
This book examines Tokyo’s changes, current challenges, and future trends through a new kind of regional geography and serves as an important source of comprehensive information about the past, present, and future perspectives of Tokyo as a global city. Regional geography relies on two main approaches. [...] 2018. XVIII, 334 p. 149 illus., 50 illus. in color. (International Perspectives in Geography, Volume 8) Hardcover

C. Fox
Data Science for Transport
A Self-Study Guide with Computer Exercises
The quantity, diversity and availability of transport data is increasing rapidly, requiring new skills in the management and interrogation of data and databases. Recent years have seen a new wave of “big data”, “Data Science”, and “smart cities” changing the world, with the Harvard Business Review describing Data Science as the “sexiest job of the 21st century”. [...] 2018. XVII, 185 p. 77 illus., 49 illus. in color. (Springer Textbooks in Earth Sciences, Geography and Environment) Hardcover

Available

Springer
Graduate/Advanced undergraduate textbook
This book discusses the concept and practice of a smart metropolitan region, and how smart cities promote healthy economic and spatial development. It highlights how smart metropolitan regional development can energize, reorganize and transform the legacy economy into a smart economy; [...]
