An Economist’s Guide to Economic History

Without economic history, economics runs the risk of being too abstract or parochial, of failing to notice precedents, trends and cycles, of overlooking the long-run and thus misunderstanding ‘how we got here’. Recent financial and economic crises illustrate spectacularly how the economics profession has not learnt from its past. […]

M. Morroni

What Is the Truth About the Great Recession and Increasing Inequality?

Dialogues on Disputed Issues and Conflicting Theories

Have you ever puzzled over the causes of the 2007–8 financial crisis and wondered how it will affect all our futures? If so, this book is for you. Using imagined dialogue between three economists with contrasting theoretical perspectives and a student who knows little about economics, different interpretations are compared in straightforward, jargon-free language. […]

Digitized Labor

The Impact of the Internet on Employment

As with previous technological revolutions, innovations in the online world have triggered transformations in the labor market and the economy. While the Internet is trumpeted as a great job creator, there are also downsides that need to be identified and dealt with. The book discusses the following topics: Is the Internet a net creator of jobs? […]

Macroeconomic Theory
Fluctuations, Inflation and Growth in Closed and Open Economies

Macroeconomics is the application of economic theory to the study of the economy's growth, cycle and price-level determination. Macroeconomics takes account of stylized facts observed in the real world and builds theoretical frameworks to explain such facts. Economic growth is a stylized fact of market economies, since England's nineteenth-century industrial revolution. [...]

---

At present, how to develop industries is a burning issue in Africa, where population growth remains high and economic development has thus far failed to provide sufficient jobs for many, especially young people and women. The creation of productive jobs through industrial development ought to be a central issue in steering economic activity across the continent. [...]

The World of Open Data
Concepts, Methods, Tools and Experiences

This book discusses the latest developments in the field of open data. The opening of data by public organizations has the potential to improve the public sector, inspire business innovation, and establish transparency. With this potential comes unique challenges; these developments impact the operation of governments as well as their relationship with citizens.

Consumer (co-)ownership in renewable energy (RE) is essential to the overall success of Energy Transition. In June 2018, the European Union agreed on a corresponding enabling framework as part of a recast of the Renewable Energy Directive (RED II).
This volume presents the most robust and useful methodology for the measurement and derivation of public investment criteria. The methodological approach solves inherent defects of traditional methodology, namely, an ad hoc application of the benefit-cost analysis.

Tailored Wealth Management
Exploring the Cause and Effect of Financial Success

The meaning of wealth has become one of the least understood concepts of our time. Whether you desire wealth, have wealth, or wish to redistribute wealth, the roadmaps to success have been painted over by outdated financial models, politically charged rhetoric, and the mistaken belief that at its core wealth is simply a number. [...]
Economists broadly define financial asset price bubbles as episodes in which prices rise with notable rapidity and depart from historically established asset valuation multiples and relationships.

---

Trade and Receivables Finance: A Practical Guide to Risk Evaluation and Structuring

Trade and Receivables Finance provides the definitive practical guide to the evaluation and mitigation of risk and the financing of international trade. The traditional method of commercial lending assessment places primary importance on the ability of the borrower to repay the financier. [...]

Success in a Low-Return World: Using Risk Management and Behavioral Finance to Achieve Market Outperformance

Following the Great Financial Crisis, the S&P 500 advanced more than 17 percent annualized from February 2009 through June 2018. At this pace, a buy-and-hold investor in the stock market would see their money double in 5 years and more than triple in 7 years. This performance has lulled many investors into thinking that such above-average returns will be with us into perpetuity. [...]

Eco-Capitalism: Carbon Money, Climate Finance, and Sustainable Development

Our planet faces a systemic threat from climate change, which the world community of nations is ill-prepared to address, and this book argues that a new form of ecologically conscious capitalism is needed in order to tackle this serious and rising threat. While the Paris Climate Agreement of 2015 has finally implemented a global climate policy regime, its modest means belie its ambitious goals. [...]

This edited volume showcases how the European cooperative banks have continued to evolve amid a new competitive scenario that resulted from the Global Financial Crisis started in Europe in 2008. The cooperative banking paradigm has been put under an unprecedented pressure as a consequence of factors such as the exceptionally low interest rates set by the European Central Bank, low profitability...
The Family Office
A Practical Guide to Strategically and Operationally Managing Family Wealth

The book offers crucial advice in helping entrepreneurs and their families find or found a family office that fits their goals. The authors survey the key considerations in this process, including: What are the different models for family offices, and what are their respective benefits? What costs can be expected from a family office, and how much wealth must be under management to justify them? [...]
