Without economic history, economics runs the risk of being too abstract or parochial, of failing to notice precedents, trends and cycles, of overlooking the long-run and thus misunderstanding ‘how we got here’. Recent financial and economic crises illustrate spectacularly how the economics profession has not learnt from its past. […]

Space Capitalism
How Humans will Colonize Planets, Moons, and Asteroids

This book compares and contrasts the motivations, morality, and effectiveness of space exploration when pursued by private entrepreneurs as opposed to government. The authors advocate market-driven, private initiatives take the lead through enhanced competition and significant resources that can be allocated to the exploration and exploitation of outer space. […]

Digitized Labor
The Impact of the Internet on Employment

As with previous technological revolutions, innovations in the online world have triggered transformations in the labor market and the economy. While the Internet is trumpeted as a great job creator, there are also downsides that need to be identified and dealt with. The book discusses the following topics: Is the Internet a net creator of jobs? […]

<td>This book examines corporate reform in Japan by focusing on corporate governance and the employment system. Contrary to a prevailing assertion of radical change, it is revealed that actual change is gradual, and a new type of Japanese firm is generated by reform with gradual change. Throughout the book, Japanese firms are seen to be evolving through gradual institutional change.</td>

The meaning of wealth has become one of the least understood concepts of our time. Whether you desire wealth, have wealth, or wish to redistribute wealth, the roadmaps to success have been painted over by outdated financial models, politically charged rhetoric, and the mistaken belief that at its core wealth is simply a number.
