New Publications
Professional and Applied Computing

Dear reader,

Springer Nature is proud to offer you a rich selection of new book publications and bestselling backlist titles in Professional and Applied Computing. It highlights the new titles most likely to interest specialists working in the professional field or in academia. You will find the international authorship and high quality contributions you have come to expect from the Springer Nature brand in every title. Please show this catalog to your buyers and acquisition staff. It is a premier and most authoritative source of new print book titles from Springer Nature. We offer you a wide range of publication types – from contributed volumes focusing on current trends, to handbooks for in-depth research, to textbooks for graduate students. If you are looking for something very specific, go to our online catalog at springer.com and search among the 286,563 books in print by keyword. The Advanced Search makes it easy to define any scientific subject you have. You can even download a catalog just like this one with your own personal selection – completely free of charge!

We hope you will enjoy browsing through our new titles and make your selection today!

With best wishes,

Ria Frauenfeld
Marketing Coordinator

A. Deschamps-Sonsino

Smarter Homes
How technology has changed your home life
Examine the history of smart homes, how technology shapes our lives, and ways you can think about the home when developing new products. This book presents the opportunities in the homespace that will come from understanding the history and multiple players that have contributed to the development of the home in general. [...]  
2018. Approx. 300 p. Softcover
approx. $24.99  
A. Pérez Castaño

Practical Artificial Intelligence
Machine Learning, Bots, and Agent Solutions Using C#
Discover how all levels Artificial Intelligence (AI) can be present in the most unimaginable scenarios of ordinary lives. This book explores subjects such as neural networks, agents, multi agent systems, supervised learning, and unsupervised learning. [...] 2018. Approx. 300 p. Softcover approx. $44.99 ISBN 978-1-4842-3356-6

A. Kurniawan

Practical Contiki-NG
Programming for Wireless Sensor Networks
Explore how to develop and implement wireless server networks (WSN) using Contiki-NG, branded as the operating system for the IoT. The book explains Contiki-NG’s advantages in sensing, communication, and energy optimization and enables you to begin solving problems in automation with WSN. Practical Contiki-NG is a guide to getting started with Contiki-NG programming featuring projects that demonst [...] 2018. XX, 230 p. Softcover approx. $29.99 ISBN 978-1-4842-3407-5

N. K. Manaswi

Deep Learning with Applications Using Python
Chatbots and Face, Object, and Speech Recognition With TensorFlow and Keras
Build deep learning applications, such as computer vision, speech recognition, and chatbots, using frameworks such as TensorFlow and Keras. This book helps you to ramp up your practical know-how in a short period of time and focuses you on the domain, models, and algorithms required for deep learning applications. [...] 2018. Next-Generation Big Data
A Practical Guide to Apache Kudu, Impala, and Spark

S. Oualline

Practical Free Alternatives to Commercial Software

Get all the things done you’re used to doing with pricey software at a fraction of the cost. There are hundreds of free programs out there that work just as well as the commercial programs people pay hundreds of dollars for. This book tells you how to find and use the most popular and useful of these. [...] 2018. Approx. 350 p. 433 illus. Softcover approx. $ 34.99 ISBN 978-1-4842-3074-9

D. Paper

Data Science Fundamentals for Python and MongoDB

Build the foundational data science skills necessary to work with and better understand complex data science algorithms. This example-driven book provides complete Python coding examples to complement and clarify data science concepts, and enrich the learning experience. Coding examples include visualizations whenever appropriate. [...] 2018. X. 140 p. Softcover approx. $ 24.99 ISBN 978-1-4842-3596-6

M. Pell

Envisioning Holograms
Design Breakthrough Experiences for Mixed Reality

Explore the approach, techniques, and mindshift needed to design truly breakthrough experiences for the Microsoft HoloLens and Windows Mixed Reality platform. Learn what’s so different about working with holograms, how to think spatially, and where to start designing your own holographic projects. [...] 2017. XXI, 317 p. 154 illus. in color. Softcover $ 39.99 ISBN 978-1-4842-2748-0

C. Pitt

The Definitive Guide to AdonisJs
Building Node.js Applications with JavaScript

Learn everything you need to master the AdonisJs framework, including topics such as interacting with a database, rendering templates, writing asynchronous code, and hosting sites with SSL. Along the way, you’ll see how to build a commerce application, which lists products and allows shoppers to register and purchase those products. [...] 2018. XIII, 249 p. 26 illus. in color. Softcover $ 29.99 ISBN 978-1-4842-3389-4

W. Quevedo

Practical NATS
From Beginner to Pro

Learn to use NATS and messaging as a solution for communication between services. The NATS project has been around since 2010, but it has become more popular in recent years due to how well it fits into the paradigm of cloud native applications and microservices architectures. [...] 2018. Approx. 300 p. Softcover approx. $ 39.99 ISBN 978-1-4842-3569-0

Modern API Design with ASP.NET Core 2
Building Cross-Platform Back-End Systems
Use ASP.NET Core 2 to create durable and cross-platform web APIs through a series of applied, practical scenarios. Examples in this book help you build APIs that are fast and scalable. You’ll progress from the basics of the framework through to solving the complex problems encountered in implementing secure RESTful services. [...] 2018. XIX, 236 p. 67 illus. Softcover $24.99 ISBN 978-1-4842-3518-8

M. Rollins

The UBTECH Jimu Robots Builder’s Guide
How to Create and Make Them Come to Life
Create robots and other mechanical devices with UBTECH’s Jimu Robots kit. This book shows you the high potential for STEM learning with the Jimu Robots, hardware, and software. You’ll design a basic and walking creation and bring to life robots of your own. [...] 2017. VII, 225 p. 304 illus. in color. Softcover $29.99 ISBN 978-1-4842-2924-8

D. J. Rouleau

Beginning Entity Framework Core 2.0
Database Access from .NET
Use the valuable Entity Framework Core 2.0 tool in ASP.NET and the .NET Framework to eliminate the tedium around accessing databases and the data they contain. Entity Framework Core 2.0 greatly simplifies access to relational databases such as SQL Server that are commonly deployed in corporate settings. [...] 2018. XVII, 338 p. 127 illus. Softcover $39.99 ISBN 978-1-4842-3374-0

S. Rozga

Practical Bot Development
Designing and Building Bots with Node.js and Microsoft Bot Builder Framework
Explore the concept of bots and discover the motivation behind working with these new apps with messaging platforms. This book is an accessible resource teaching the basic concepts behind bot design and implementation. Each chapter builds on previous topics and, where appropriate, real working code is shown that implements the concepts. [...] 2018. XX, 300 p. Softcover approx. $39.99 ISBN 978-1-4842-3539-3

D. Rubio

Beginning Django
Web Application Development and Deployment with Python
Discover the Django web application framework and get started building Python-based web applications. This book takes you from the basics of Django all the way through to cutting-edge topics such as creating RESTful applications. [...] 2017. XXVII, 593 p. 116 illus., 115 illus. in color.
