The French Parliament and the European Union

Backbenchers Blues

This book explores how the European Union has changed the French Parliament since 1992. It supports the view that the institutional adaptation of both assemblies to European affairs is largely superficial as it lacks a genuine involvement from members of parliament. Nevertheless, the role of backbenchers has changed in the context of European integration. [...]

Non-Nuclear Peace
Beyond the Nuclear Ban Treaty
This volume examines the possibility of a world without nuclear weapons. It starts from the observation that, although nuclear deterrence has long been dominant in debates about war and peace, recent events show that ridicule and stigmatization of nuclear weapons and their possessors is on the rise. [...]
The field of political science has not given sufficient attention to pedagogy. This book outlines why this is a problem and promotes a more reflective and self-critical form of political science pedagogy. To this end, the author examines innovative work on radical pedagogy such as critical race theory and feminist theory as well as more traditional perspectives on political science pedagogy.
This volume explores the past, present and future of pessimism in International Relations. It seeks to differentiate pessimism from cynicism and fatalism and assess its possibilities as a respectable perspective on national and international politics.
